## Jio music set caller tune app

Reliance Jio is touted to offer melodies calling aka JioTunes's over four lak songs across genres such as Bollywood, Regional, International, Instrumental, and Devotion. Users are provided these ringback tunes for free - along with the ability to switch between different tunes at no extra cost. This means that you can apply a tune calling Jio on behalf of your mood or to celebrate a particular event. Telco also gives multiple different ways to allow users to set a Jio calling tune on their connection. Furthermore, the possibility to copy a Jio calling tune from a user is provided to make things even easier. In this article, we list all available methods through which you can easily apply a Jio caller's tune to your connection. You can choose a Jio Tune or Jio caller tune on your connection directly using the MyJio app on your smartphone. The MyJio app is available for download on both Android and iOS devices. The Size of the Android app is around 28MB, while the iOS version is available through apple's app store at a size of over 225MB. It is compatible with devices running at least Android 5.0 Lollipop or iOS 10.0. After you've downloaded the latest version of the MyJio app, you can follow the steps available below to set up the caller melody. Select JioTunes by tapping the burger icon from the upper-left corner of the MyJio app, and then tap the Songs tab. Search for your favorite JioTune or select one of the songs listed. There are various titles from Bollywood, international, regional and dedication genres to choose from. Now tap the power button located below the song's album collection to listen to the preview. Tap Set as JioTune button to select the melody. Jio will notify you of the song you selected as the calling tune after it is set to your connection using a confirmation screen in the MyJio app. You will also receive an SMS confirming the activation of the caller service. How to set up a Jio calling tune using the JioSaavn App If you don't want to use the MyJio app but are eager to set up a communicating tune of one of your favorite songs, you can prefer the JioSaavn app too. The JioSaavn app is available on both Android and iOS platforms. You can download it from Google Play or the Apple App Store. The app is compatible with devices running at least Android Lollipop or iOS 10.0. After you download the latest version of JioSaavn, you must sign in to your JioSaavn account, and then follow these steps. Search for your favorite song in the Jio Saavn app you want to set as a caller's tune and then play this song. Tap this song from the bottom bar to bring it in front of the screen. Now, tap the Set JioTune button available just below album moderate and song title. You'll then get a pop-up screen from where you can listen to the caller's preview. Now, click the Set JioTune button. An SMS will reach your number after you activate the preferred Jio Tune. The message will also contain details to disable the changed tune. How to set up Jio Tuned by sending SMSFor users who don't have the MyJio or JioSaavn apps, there is an option to set up a Jio caller tune by sending simple SMS messages. To explore the available list of JioTunes or Jio caller tunes, send JT (no quotes) to 56789. You can search for a movie by replying to the MOVIE-ready SMS message. Alternatively, you can search for an album by replying with an album (album name) or singer by answering with SINGER (singer's name). Once you can find your favorite song for the calling tune, Jio will ask you to choose whether you want to set it up for all callers or any special numbers. Now, an SMS will reach your number that will require your consent to activate the JioTunes service. You must reply with Y to this message to agree with the session. Your reply should arrive at Jio within 30 minutes of the message to perform the activation process. Jio will send you an SMS message to confirm the caller intentional activation. At any particular time, you can unindent the Jio caller by sending an SMS with STOP text to 56789. How to copy a Jio caller's tune in case you want to copy a caller's tune from one of your Jio contact, you must click \* (asterisk) when dialing that contact. An SMS will reach your number, which requires your consent. You must reply Y to this message to activate Jio's selected caller melody. Jio will send you an additional SMS message to confirm activation. As mentioned above, Jio now offers free calling tunes to its customers. You can also change the existing tune of a Jio caller with a new tune at any number of times at no cost. Furthermore, caller tunes only work on new conversations as a whole. This means that the caller calling your number when you are already on call will listen to the composer to respond to the default call instead of the caller's playing melody. Furthermore, a deliberate caller service is agnostic device and can work on all devices that support the Jio network. Like Gio, Airtel also earlier this year began offering free caller tunes to its customers under the Airtel Thanks program. The operator claims to offer over a million songs in 15 languages - significantly higher than what's available at Gio. Airtel users can set a calling tune on their number using the Wynk Music app on their Android or iOS device. Alternatively, users can make a call or send an SMS to 543211. It is important to emphasize that both Jio and Airtel offer tunes communicating with a validity of 30 days. However, users can extend the validity upon completion of the first 30 days. If you want to change the tune that communicates the coronavirus alert to a fun or mesmerizing tune, then there are four methods to do it. So, you actually need to run JioTunes, which is currently offered to Jio customers at no cost. User Reliance Jio can set up a calling tune using the MyJio app, IVR or by SMS. Interestingly, the telecom operator even allows to copy JioTune from another Jio client.
